Sex and Relationships Policy 2017

Background Information

Kingston Community School is a brand new free school (part of the Chapel St family of schools) with a Christian ethos of love, grace and fellowship.

The school will provide places for children in the local and wider community including those from across the Royal Borough of Kingston London Borough but particularly from areas around Kingston. Children come from a variety of family backgrounds and reflect the social, ethnic and religious nature of this area and we welcome children from all faiths. Our school population is inclusive of children with special needs who have a range of needs of varying types and degrees of severity, as well as children for whom English is an Additional Language. Both SEN and EAL pupils are supported by a range of personnel and wide-ranging strategies to ensure equal access to the curriculum including Sex and Relationships Education.

At Kingston Community School, we believe sex and relationships education (SRE) goes beyond the biological knowledge of sex and the importance of personal hygiene; it also has moral, legal, religious, cultural and ethnic dimensions. It is part of our 'Healthy Schools' belief and approach to welcoming all children and their families to our school to guide and develop the children in making informed choices, to understand and deal with their emotions and experience healthy relationships with others. We aim to achieve this through our school's approach and the Chapel St ethos of "Love, Grace and Fellowship".

Aims of Sex and Relationship Education (SRE)

NB: The aim of the SRE policy is to clarify the content and the manner in which SRE is delivered in this school. This policy forms part of our overall policy on PSHE and Citizenship.

We recognise that effective sex and relationship education is essential if young people are to make responsible and well-informed decisions about their lives but it should not be delivered in isolation. We aim to give the children in our care support and help in their physical, moral and social development so that they will learn to respect themselves and others and to move with confidence from childhood through adolescence to adulthood.

SRE is lifelong learning about sex, sexuality, emotions, relationships and sexual health. It involves acquiring information, developing skills and forming positive beliefs, value and attitudes. Kingston Community School believes that SRE in this school will be developmental and a foundation for further work in the secondary school phase. The school will work towards this aim in partnership with parent/carers and in accordance with the National Healthy School Standard whole school approach and statutory expectations of the National Curriculum in England.

At Kingston Community School, we lay the foundations for this through many areas of the curriculum, most notably our Ealing Personal Social Health Education (PSHE)

programme, supported by SEAL (Social and Emotional Aspects of Learning) resources; our science within our curriculum. We provide education about relationships including focusing on friendships, bullying and the building of self-esteem, through our SRE which is a programme included within the Healthy School London website (Appendix 1).

SRE at Kingston Community School lays the foundation of personal and social development by ensuring that all children will be supported to develop the attitudes, skills and knowledge, which will help them to have enduring, loving and fruitful relationships. We aim:

- To develop confidence in talking, listening and thinking about feelings and relationships
- To ensure that SRE is inclusive of all pupils and all religions and cultures; it will be based upon the knowledge of and sensitivity toward individual children, as well as to group needs, i.e. maturity, gender, religion, culture and SEN
- To impart knowledge so that children can understand and take responsibility for their actions
- To provide children with the correct language and terminology to discuss the changes in their bodies and an awareness that other language may be used
- To help children gain confidence to understand and explain their feelings, their relationships and the changes in their bodies
- To help children to keep safe from unwanted attention and to ensure that they know where to go for help and advice
- To prepare children for puberty and changes in their bodies
- To contribute to children's emotional health and well-being and, in particular, to understand their rights as human beings and the rights of others
- To teach children to be aware of the breadth of human sexuality
- To reduce prejudice and stereotyping

With this foundation it is expected that children and young people will develop the skills and confidence to enable positive discussions about sexuality and sex and relationships as they get older in preparation for adult life.

Moral and Values Framework

We believe that policies should reflect the ethos, values and beliefs of the school as a whole and have ensured that this policy links with other relevant policies including those on Teaching and Learning (in process), Child Protection (safeguarding), PSHE (in process); Drugs Education (in process); Behaviour (including anti-bullying), Equal Opportunities, Assessment (in process), and Visitors/Parent Helpers Policy (in process).

Content

The SRE programme will:

- provide information which is easy to understand and relevant and appropriate to the age and maturity of our pupils
- include the development of skills, including communication and social skills
- encourage the exploration of values and attitudes

SRE will be mostly taught in the context of relationships. Topics and themes will be repeated from year to year in greater depth taking account of the pupils' development and the spiral curriculum concept. Learning in this area will be integrated into the children's topics and approached at an appropriate level in each year group.

Other resources which the school will dip into to support a broad approach to the content and underlying principles of the SRE programme will be drawn from the Health Development Agency 'Primary Project for Health Education', 'Health for Life' by Noreen Wetton, 'I am, I know, I can,' by Tacade; the Family Planning Association 'Sex Education: Why, What and How?', the National Curriculum Science and PSHCE Framework, the SEAL project; Developmental Assets Programme and SRE Guidance and the National Healthy School Standard (see below).

Topics covered in the school's SRE programme

SRE PRIMARY CURRICULUM OVERVIEW

	FOUNDATION STAGE	KEY STAGE ONE		KEY STAGE TWO			
	Early Years	Year One	Year Two	Year Three	Year Four	Year Five	Year Six
TOPICS	Myself and Others	Myself and Others	Differences: Boys and girls	Self Esteem	Growing and Changing	Talking about puberty	Puberty and reproduction
	Family Networks	Body Parts	Differences: Male and Female	Challenging Gender Stereotypes	Body changes and reproduction	Becoming men and women	Relationships and reproduction
	Body Awareness	Family	Naming Body Parts	Differences: Male and Female	What is puberty?	Puberty and hygiene	Conception and pregnancy
	Hygiene	Friendships	Everybody needs caring for	Family Differences	Thinking, feeling, doing – changing relationships	Menstruation and wet dreams	Being a parent
		Choices	Looking after the body	Decision Making	Assertiveness	Menstruation education for girls	HIV Transmission
				Safety	Your questions answered	Building good relationships	Your questions answered
	Include assessment opportunities in every lesson and at the end each unit. See section 4 on assessment						

Organisation

a) Planning

SRE is jointly co-ordinated by the BPD/WB (Behaviour, Personal Development and Well Being) and Science Co-ordinator. Planning for individual sessions/lessons is carried out by the year group teachers through their weekly planning.

b) Delivery

- as topics
- through planned aspects of science
- through pastoral time including circle time and hive assembly (school council/circle of friends)
- addressed occasionally during whole school assembly time
- Through planned inputs from the school nurse and other health professionals

c) Teaching approaches

A variety of learning approaches which encourage pupils' full participation are used. Special attention is given to differentiated teaching so that the needs of all pupils are met wherever possible. These differentiated needs may be in terms of emotional and physical development, life experiences, literacy levels and learning difficulties (ref PSHE scheme of work)

d) Pupil groupings

Pupils are taught in mixed ability and mixed gender groups for the majority of the SRE programme. This is an integral part of the PSHE, Science and RE curriculums. However, when there is a specific need (e.g. members of a faith group, sensitivity of the topic), arrangements will be made to teach pupils in alternative appropriate groupings (e.g. when visiting a place of worship in conjunction with the relationships development aspect of our curriculum).

e) Resources

A wide range of teaching resources to support the delivery of the programme are available to teachers (and for inspection by parents if requested) through the PSHE Co-ordinator or Headteacher. The school uses a checklist provided by the Sex Education Forum to help in the selection of SRE resources to ensure that they are appropriate.

f) Staff

At present all members of staff are committed to delivering the programme and are supported through a training programme and specialists from the local Healthy Schools Team. However, if a member of staff feels ill equipped to take on the programme, the Deputy Head, PSHE or Science Co-ordinator will co-deliver the programme as an interim measure until the member of staff feels confident to resume this responsibility independently.

g) Time available

SRE forms some aspect of the curriculum in every year group (see SRE element of the PSHE, RE and Science Schemes of Work).

h) Assessment, Monitoring and Evaluation

Lessons will include formative assessment (for learning) to assist with planning, and summative assessment (of learning) to ensure that pupils reflect with the teacher on what they have learned in terms of knowledge and understanding, development of skills, and how their attitudes and values may have changed. This is carried out in a variety of formal and informal ways and will depend very much on the age and maturity of the pupils and the intended learning outcomes.

Teachers also have the opportunity to reflect on what they have learned from the programme and are involved in its regular review and improvement.

Teachers are required to report on personal and social development in pupils' annual school reports and will incorporate progress and achievement in SRE within this (ref. Borough SRE Guidance and the school's Assessment Policy).

The PSHE and Science Co-ordinators will lead on monitoring and evaluating the teaching programme as a whole, at regular intervals throughout the year and formally on an annual basis.

Specific Issues

Staff, parents/carers, pupils and relevant external agencies need to understand the schools' procedures on any of the following issues, should they occur.

a) Equal Opportunities

Through careful planning and assessment of the children we will ensure that all children receive appropriate information and opportunities to participate in sex and relationship education, ensuring that differentiation and access to the SRE curriculum are made available to all children. For further information, see the Equal Opportunities Policy.

b) Confidentiality and personal disclosures

Pupils will be made aware that some information cannot be held confidential especially if it concerns possible physical or sexual abuse, but that their best interests will be maintained at all times. Pupils will be told beforehand if confidentiality is to be broken, the reasons why and what course of action will happen next. At the same time pupils will be offered sensitive and appropriate support.

Teachers are not legally bound to inform parents or the Headteacher of any disclosures unless the Headteacher has specifically requested them to do so.

The following procedures will be adhered to by all adults:

i) Disclosure or suspicion of possible abuse –

The school's child protection procedures will be invoked and the member of staff must talk to the school's Designated Safeguarding Lead first to clarify what needs to happen next (see Child Protection Policy).

ii) Disclosure that a child is sexually active or contemplating being sexually active -

This will be viewed as a child protection issue and the designated teacher will deal with any such rare incident.

Health professionals are bound by their professional codes of conduct in a one-to-one situation with individual pupils, but in a classroom situation they must follow the school's Confidentiality Policy.

c) Relationships and Family Life

Pupils are required to learn about the nature of marriage and its importance for family life and the bringing up of children. The school recognises that there are also strong and mutually supportive relationships outside marriage. Staff will therefore approach this topic by emphasising the significance of marriage and stable relationships as key building blocks of community and society, with an emphasis on stability, respect, caring and support within relationships.

d) Parental partnership

We seek to survey parental views to support the school's SRE provision and will share outcomes and use parental feedback to continually develop SRE to meet our children's needs. We also hope to allay any fears or concerns they may have about the policy or programme.

However, under the Education Act 1993 parents have a right to withdraw their children from all or part of the SRE programme, except for those parts included in the statutory National Curriculum. Parents wishing to exercise this right are asked to make an appointment with the Headteacher to discuss the issues in a sensitive and confidential manner. If this is not possible, parents are required to put this withdrawal in writing before it can be acted upon. (Once a child has been withdrawn they cannot take part without written parental permission). The school will make alternative arrangements for any such pupils.

e) Use of visitors

There are various people who can resource and support school based SRE. These people may include parents, the school nurse, religious or health professionals.

It is the PSHE co-ordinators' and teachers' responsibility to identify clearly the role and purpose of the outside visitor and to ensure that the visitor is aware of relevant school policies and the values framework in which they will work.

Monitoring effectiveness of the SRE Policy

- a) Effectiveness of the whole school policy will be monitored by SLT who are curriculum, PSHE and Science Co-ordinators.
- b) The policy will be monitored every 2 years and any recommendations reported to the governing body for their approval and a summary if appropriate included in the school profile.
- c) The SRE programme will be monitored annually and any changes reported to governors. The policy will be made available to all parents when their child enters the school.
- d) The Safeguarding LAB member will have a link role between the school and the LAB .

Dissemination of the policy

A summary of this policy is available on the school website and the full scheme of work available on request.
